**For Canker Suppression**  
**CS 2005**

**Magna-Bon CS 2005** relies on new chemistry to promote the greatest bacterial activity with a minimum amount of metallic copper. While currently available copper bactericides, fungicides have up to 22.7 bioactive units of copper per unit volume, **Magna-Bon CS 2005** has 50,000 bioactive units of copper per gallon. **Magna-Bon CS 2005** is completely water soluble, thereby eliminating nozzle wear and improper calibration. Many copper products are in a powder form, bulky, dusty and must be under constant agitation. Others are coppers in suspension, also needing constant agitation. **Magna-Bon CS 2005** is copper in solution. **No agitation needed.**

**Magna-Bon CS 2005** is now a USEPA registered bactericide fungicide for use on citrus. **Magna-Bon CS 2005** is a copper sulfate pentahydrate based, acidic, liquid pesticide. For use in the fight against Citrus Canker we recommend 100 ppm to 250 ppm of copper depending on the infestation. If using a CDA (such as a Curtec™ @ 30 gpa) you can use as little as 8 ounces of **Magna-Bon CS 2005** per acre for maintenance sprays of 100 ppm copper.

**Need to defoliate?** Use **Magna-Bon CS 2005D**. Sprayed at 4 ounces per 1 gallon of water, **Magna-Bon CS 2005D** will defoliate your trees within 3-5 days with new foliage beginning within 4-6 weeks. Follow up with **Magna-Bon CS 2005** maintenance sprays at 100 ppm and keep your trees protected.

**Magna-Bon** also manufactures **Magna-Bon Eradicator**, USEPA labeled and CCEP approved for your Citrus Canker wash and drench stations. **Magna-Bon Eradicator** has proven time and again that it stops citrus canker in less than 60 seconds. It is the only product that has a residual assuring constant protection.

**Magna-Bon** has been serving the needs of the Florida citrus community for over 15 years. As we face new challenges let us help you in the fight to stop the spread of Citrus Canker. **Magna-Bon Eradicator** for Wash Stations. **CS 2005** and **Magna-Bon CS 2005D** for Citrus trees. Call us, we can help.
