

CS 2005

Our copper sulfate pentahydrate in-solution formula is OMRI-listed with systemic capabilities and has proven results combating disease in **copper-resistant strains**! It's environmentally friendly by using less than an 1/8 lb per acre of metallic copper specifically designed to combat agricultural diseases for a variety of specialty fruits, vegetables, citrus and tree nuts!

Research performed by *Dr. Jim Adaskeveg* - UC Riverside, inoculated walnut trees with copper resistant strains of Walnut Blight. As you can see, **CS 2005** mixed with Manzate had **100% control** of the disease!
