

## CS 2005

From specialty fruits, vegetables, citrus, and tree nuts, our copper sulphate pentahydrate is designed to help combat disease! With less than an 1/8 lb of copper per acre, **CS 2005** is more environmentally friendly than our competitors!

### Effect on Bacterial Spot in Almonds

Efficacy of In-Season Bactericide Treatments for Management of Bacterial Spot of cv. Fritz Almonds in San Joaquin County, 2014

(Data provided by Dr. Jim Adaskaveg, UC Riverside)

#### Spray Program for Season

Full bloom 2/18 64 floz + 6 lb Manzate 75DF  
Petal fall 3/5 27 floz + 4 lb Manzate 75DF  
2 Weeks APF 3/20 27 floz + 4 lb Manzate 75DF  
4 Weeks APF 4/3 27 floz + 4 lb Manzate 75DF

Using  $\frac{3}{4}$  of a Pound of Metallic Copper Per Acre for the Whole Growing Season!

\*\*Treatments were applied at a rate of 100 gal/A using an air-blast sprayer\*\*

**Less Copper, More Power!**
