

Magna-Bon® CS 2005

Cornell University Research Trials

100% Control of Fire Blight

Magna-Bon CS 2005 is an **OMRI-listed** copper sulfate pentahydrate in-solution formulation with contact and systemic activity. Using less than ¼ lb of metallic copper per acre, CS 2005 helps growers manage key apple diseases while minimizing environmental impact.

Anthracnose • Apple Scab • Blossom Blast • Collar Rot
Crown Rot • European Canker • Fire Blight • Shoot Blast

Fire Blight Research in Apples

Cornell University - Kerik Cox

Incidence of Blossom Blight

Spray Program

A field trial at Cornell AgriTech in Geneva, NY evaluated bactericide programs for managing blossom and shoot blight in 18-year-old 'Idared' apples on B.9 rootstock. Treatments were applied from Silver Tip through Terminal Shoot Growth, with rates measured per acre. No russeting occurred in any treatment.

Why Growers Choose Magna-Bon CS 2005

In-Solution Copper Sulfate Pentahydrate for Advanced Disease Control

OMRI-Listed for Organic Use
Trusted for sustainable agriculture.

Dual Mode of Action: Contact & Systemic
Controls disease on the surface and from within.

Minimizes Environmental Impact
Effective disease control with less copper per acre.

Research Backed. Field Tested. Grower Approved.
