

Magna-Bon®

CS 2005

A & L Laboratories Research Trials
99% Control of Bacterial Leaf Spot

Magna-Bon CS 2005 is an **OMRI-listed** copper sulfate pentahydrate in-solution formulation with contact and systemic activity. Using less than ¼ lb of metallic copper per acre, CS 2005 helps growers manage key almond diseases while minimizing environmental impact.

Anthracnose • Bacterial Spot • Cerospora Leaf Spot

Bacterial Leaf Spot Research in Peppers

A & L Laboratories

Research conducted by A & L Laboratories, Inc. evaluated CS 2005 for bacterial leaf spot management in bell peppers. Across 30, 60, and 90-day evaluations, CS 2005 consistently recorded the lowest disease values among treatments. At 90 days, CS 2005 achieved a disease value of just 1.5% and 4.2% for the untreated control.

Why Growers Choose Magna-Bon CS 2005

In-Solution Copper Sulfate Pentahydrate for Advanced Disease Control

OMRI-Listed for Organic Use
Trusted for sustainable agriculture.

Dual Mode of Action: Contact & Systemic
Controls disease on the surface and from within.

Minimizes Environmental Impact
Effective disease control with less copper per acre.

Research Backed. Field Tested. Grower Approved.
